## CEILING/WALL MOUNTED INTENSIVE CARE UNITS

Intensive care services one of the most important services of a healthcare establishment.

In hospitals or clinics, critical care rooms have demands for services unlike any other patient care area. With Ceiling/Wall intensive care units you can provide intensive care service more than one patient at same time.

- Manufactured from first quality aluminium parapet channels.
- Each one of the electric cords and medical gas pipes are located in different channel for safety and easily installation.
- Each one of the ceiling mounted intensive care unit and wall mounted intensive care unit have two accessories rail on upper parts and lower parts for hanging intensive care equipments. Accessories rail allows you to put and reach medical equipments easily which you needed.
- They have infusion pump stands for hanging these medical equipments.

### Medical Rail Systems

The only horizontal rail system offering the complete mix of services.

The services you can chose include fixed and movable medical gas and vacuum, normal power, emergency power, and communications within a single rail, with or without a vertical service chase.

Rail systems are available in over 200 colors and textures, to complement any interior design concept.

## **H - TYPE INTENSIVE CARE UNIT**

H Type Intensive Care unit allows you to provide intensive care service more than one patient at same time and staff access to the patient on all sides of the bed. The electric system is on backside of the columns and medical gas system is on front side of the columns. Also there are shelves between the columns for monitor and other medical accessories. . The biggest advantage of H-Type intensive care unit is provide medical gas supply to two sides of the patient bed.

- Manufactured from first quality aluminium parapet channels.
- Each one of the electric cords and medical gas pipes are located in different channel for safety and easily installation.
- Connections for examination lamps and infusion pump stands

- Connections for examination lamps and infusion pump stands

# Medical Rail System and ICU Space Management Accessories

CE 0473

- 1- Examination lamp with halogen lamps, integrated transformer, power cable, clamps for all rail system, adjustable in any position. (YA 01 001)
- 2- Storage basket of stainless steel, web-wire with rack for rail system 25 x 10 mm, available size. (YA 02 001)
- 3- Infusion bottle holder with clamps for rail system, adjustable height, optional with 2, 4 or 6 infusion bottle racks. (YA 03 001)
- 4- Medical gas outlets for oxygen, vacuum, compressed air and nitroprotioxide. (GE 01 0000)
- 5- UPS sockets 220V. (ES 01 0001)
- 6- Electricity to ground points for security. (ES 02 0001)
- 7- Electric sockets 220V. (ES 01 0002)
- 8- Electric switches. (ES 03 0001)

- 9- Vacuum regulator with rail attachment. (GE 02 3000)
- 10- Monitor rack of stainless steel with clamps for rail system with adjustable wall bracket, load capacity 35 kg. surface area including single drawer. (YA 03 002)
- 11- Vacuum jar with rail attachment. (GE 04 0000)
- 12- Flowmeter with rail attachment. (GE 05 0000)
- 13- Thorax (Water vacuum regulator) with rail attachment. (GE 03 0000)
- 14- Medical equipment stand with storage drawer. (YA 02 0002)
- 15- Two-way catheter bottle with removable plexiglass disc and rail bracket for wall-rail system. (YA 04 001)
- 16- Rails for medical equipments. (RS 01 1000)
- 17- Rail system for monitor rack. (RS 02 1000)

Examiantion lamp with flexible arm on five castor stand

Rail mounted examination lamp with adjustable arm. (YA 01 0001)

## MEDICINE TROLLEY

- Special galvanized metal or aluminium construction
- Electrostatic wrinkle finishing
- Trommel carrier
- Big size waste basket
- Transparent, antibacterial boxes
- Portable pan holder
- Drawer
- Medicine preparing shelf
- 4 plastic covered 125 mm castors (2 with brake)

ITEM NO: MT 01 0108
